

World Children`s Day 2024

Today WE ARE TALKING – the Children of this world

Adults always say: Children are the future! We want to build our Future in peace, living respectfully alongside and with each other. We want to be happy and enjoy the sun, the flowers, the sea and all the animals.

- 1. Why do soldiers come to our school and force us to think about a profession without telling us the truth about how bloody and deadly wars are? It makes us sad when people tell us how important it is to deal with weapons in order to protect ourselves from others. What nonsense! “The one who shoots first, always dies second”. And think about it, every bomb is more powerful than any weapon we could fire ourselves.
Why should we fight and hate people we don`t even know?
How does hating feel? We don`t even want to know!
There are so many more important things than death and destruction.**
- 2. We have never ever actually seen a fox-human or a mermaid-human, except in fairy tale books. Why should we believe that now! No, these are things, that don`t interest us at all. Why don`t you play it, if that`s what you want? Leave us alone.**

**Our bodies belong to us! Our parents should educate us in sexual things, not the school-teachers or kindergarten-teachers.
We would rather learn things that are important for us later on.
We learn and experience Sex and love when our time has come.
Our bodies will show us, just like you and so many people around the world before us!
Don` t push us to do things we are not ready for!**

- 3. Why should it suddenly be wrong that our moms and dads are still together and that we still have the same grandmas and grandpas as ever?**

We don` t understand you! Are you ashamed of your moms and dads, grandmas and grandpas? We are not! We are happy the way things are, the way god and nature created it.

It gives us the safety, security and protection that we so urgently need as children. Don` t take it away from us!

Why do you want to bend and break us, we are children, the future of this world. We are not puppets, nor dolls and not guinea pigs or toys for you!

Let us go into our future free, happy and proud. Without fear and insecurity. Strengthen us in our strengths, help us with our weakness and see us for what we are: CHILDREN!!!
